# Everything you love. Now digital.

PowerMate 3000-X, the next evolution of an icon.

**PM3000-X**

Amplified Mixing Processor

One box. The whole system.
Mixer, amplifier and media player, with the right controls for every user

- IX power: 3,000 W on 4 channels, Hi-Z or Lo-Z, up to 1,000 W per channel
- FIR-Drive speaker settings
- PowerMate EQs, Vocal Voicing and Dynacord FX
- Analog-style web mixer with X-TRA EQ and dynamics
- Custom control for every user

## Start easy. Go deeper when you want.

For nearly three decades, PowerMate has combined exceptional sound quality, studio-quality effects, proven reliability, and industry-leading integrated amplification to become a Dynacord icon. Now, the PowerMate 3000-X amplified digital mixing processor brings everything you know and trust into the digital era, with more power, more control, and more possibilities.

8 inputs · 4 amp channels · 3,000 W · 3RU

# Good sound. By default.

Four amplifier channels share 3,000 W and drive Hi-Z and Lo-Z loads, built for years of daily use.

Inspired by the classic analog PowerMate, the browser-based mixer puts its controls in plain view, nothing buried in menus.

**Eight mic/line inputs** with **X-TRA EQ** and dynamics, **four 12-band graphic EQs**, and **two stereo FX engines** shape your sound. **Standard connectors, network ports**, and a **class-compliant USB** audio interface simplify everyday use and integration. **Four amplifier channels** share **3,000 W** and drive **Hi-Z** and **Lo-Z** loads, built for years of daily use. As administrator, you decide who gets which controls. Customized user interfaces give staff only what they need.
**Still a PowerMate, but digital.**

## PM3000-X

| SPECIFICATIONS | |
|---|---|
| **Total rated output power** | 3,000 W |
| **Amplifier channels** | 4 |
